

National Training Network

Staff Development + Proven Methodology **SUCCESS**

*“Our school district is committed to preparing all students for success in college, careers, and life. Knowledge of mathematics is essential to this goal. The strength of **National Training Network** is that it combines hands-on curriculum, intensive professional development, ongoing modeling, and coaching support. With this combination of components, **National Training Network** provides our school district with the right tools to direct our students toward success in algebra.”*

—Dr. Joe A. Hairston
Superintendent
Baltimore County Public Schools
Baltimore, MD

Seven Levels of Staff Development Support

Staff development is viewed as a process, not as an event. National Training Network's "Seven Levels of Staff Development" create an essential link between classroom instruction and higher student achievement.

Level 1: Intensive Professional Development

The eighteen to thirty hour workshop prepares teachers to incorporate the key math concepts using unique methodology to meet the needs of emerging math students.

Level 2: Ongoing Coaching

A coach visits each school on a regular basis to support the teachers with proper implementation and methodology.

Level 3: Regular E-Communications

Each teacher receives a regular e-communication containing information to enhance execution of key math concepts specific to his/her grade level and district pacing.

Level 4: Website – www.NTNMath.com

A resource for teachers, parents, and students, the website provides essential components of all NTN products.

Level 5: Professional Learning Communities

Ongoing professional development sessions are provided throughout the school year.

Level 6: Demonstration Lesson DVDs

DVDs of lesson segments reinforce concepts learned by teachers in the workshops and can be used in their classroom to introduce or revisit lessons.

Level 7: Training of Trainers

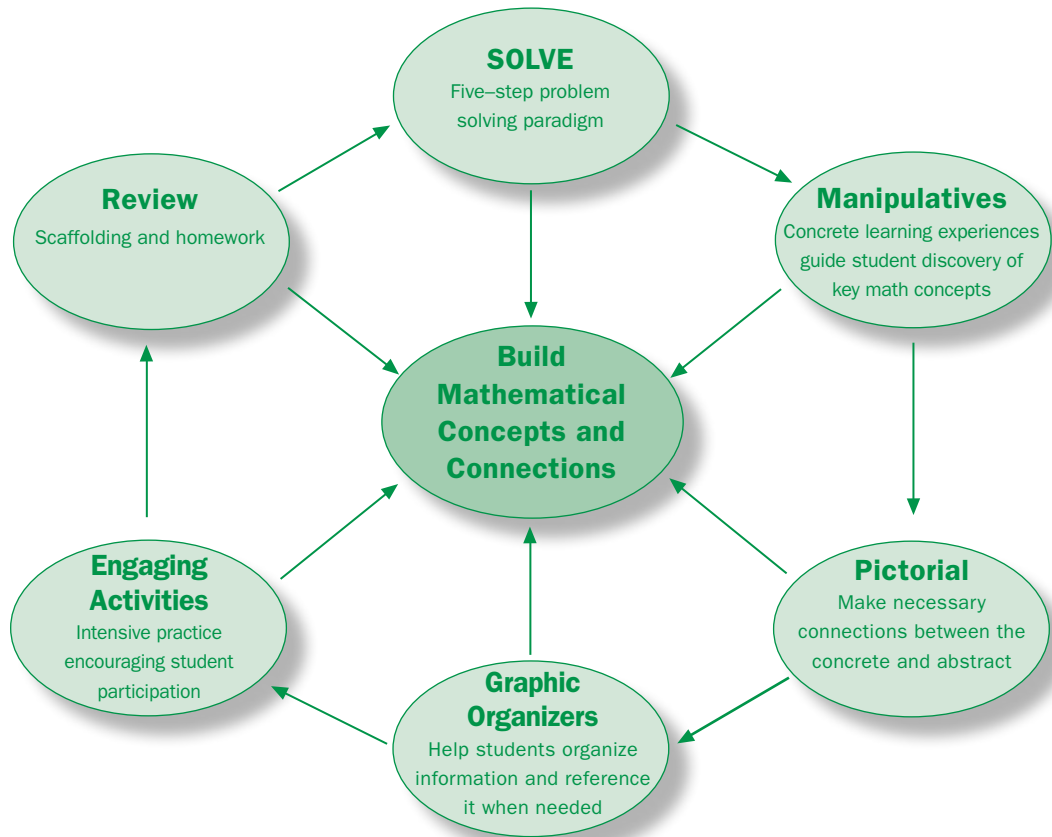

Teachers are selected by their district and trained to build the capacity of the district to support ongoing implementation.

"The National Training Network has been committed to provide a hands-on curriculum that engages and supports learning, intensive professional development that facilitates teacher growth in a safe and challenging way, and ongoing coaching support for our staff in a healthy manner."

— Dr. Josh Garcia
Executive Director of Teaching and Learning
Federal Way Public Schools
Federal Way, WA

NTN Methodology

Every lesson links multiple representations to help students make critical connections needed to understand the mathematical concepts.

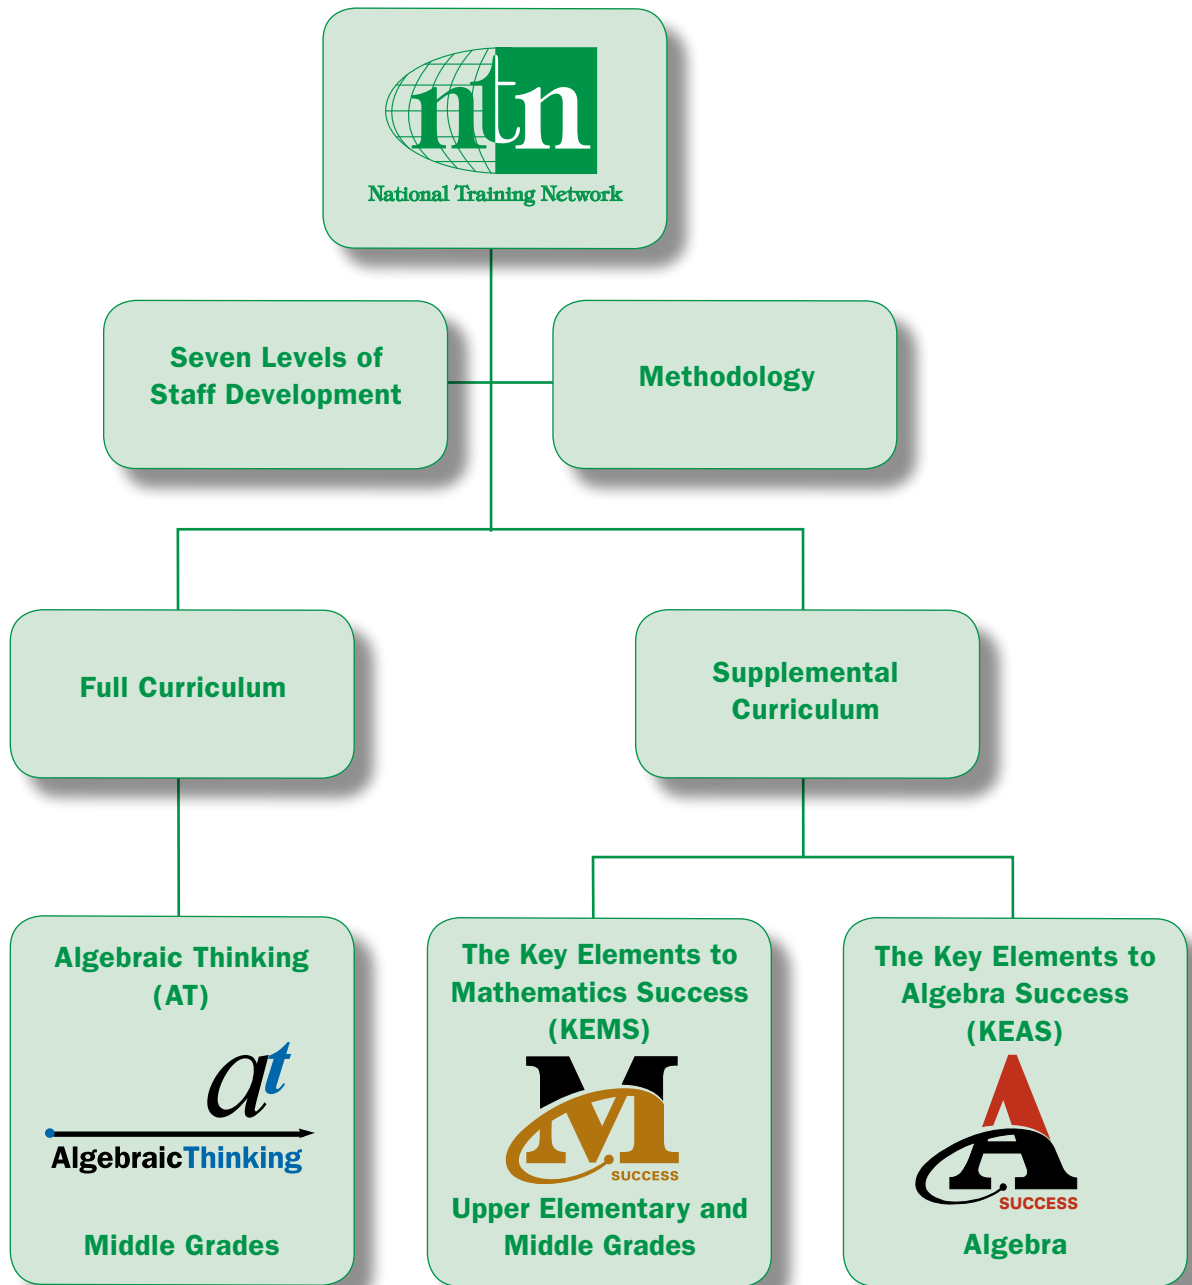

“National Training Network ensures the developmental progression of concept instruction in a systematic way. It is evident that the achievement gap is narrowing for our students with a history of difficulty in math.”

—Dr. Eva White

Academic Manager, Area 3

Clark County Schools, Las Vegas, NV
