

## LESSON 29: Classify Two-Dimensional Figures

## Homework

.....  
Name \_\_\_\_\_ Date \_\_\_\_\_

1. Circle the shape that has parallel lines.

2. Draw an obtuse triangle in the space below.

3. Circle the shape that has perpendicular lines.

4. Draw a right triangle in the space below.

5. What is an obtuse angle?

LESSON 29: Classify Two-Dimensional Figures

**Homework**

.....

**Name** \_\_\_\_\_ **Date** \_\_\_\_\_

**6.** Circle the shape that has two acute angles and two obtuse angles.

**7.** What type of angles are in a regular hexagon?

**8.** Name 2 two-dimensional figures that have perpendicular lines.

**9.** A decorative tray is in the shape of a parallelogram. What types of lines does the decorative tray have?

**10.** What types of angles are the three angles of an obtuse triangle?
